

ABE 290

Sophomore Seminar

Introduction to Agricultural and Biological Engineering

Homework #2

Your assignment HMK #2 is to develop your personal 1 page resume based on this week's seminar and the materials from CCO which were handed out in class on Tuesday of this week. This is a required assignment and will be due one week from today on **Tuesday September 6th, 2016** at the end of class (paper copy only).

Note, if you already have a resume prepared and you would like our input before the Industrial Roundtable (IR) we will accept resumes for review beginning on **Thursday September 1st , 2016** so that we can hand them back to you before the IR in time for you to edit them.

In addition, we (Dr. Ladisch and Dr. Bralts) will hold an extra Resume Review Session on **Thursday September 8th 2016** where we will hand back your resumes and answer any questions that you might have in preparation for the IR. This is not a required class so no attendance will be taken.
